Upload an Image button

Remove this Image button

3. Default upload location is set as the Article itself, user can change this if they wish to share across multiple docs

4. Normal upload controls show up to upload an image from local machine

5. We have already added "Credits / Caption / Alt Text" for images for other images. I assume we can expose these fields here?

6. Clicking edit on the in body image in the article should re-open this window to allow adjustment
